

Duress/Call Station Model DC1

Description:

The Corvinus Electric DC1 Duress/Call station is designed to provide long-lasting communications from a “call-in” point to a central control.

The DC1 incorporates piezoelectric switch technology, which is impervious to dust and water.

Utilize the DC1 assembly in conjunction with Corvinus Electric DR series key switches or as a stand-alone signaling device when a remote call-in button is desired.

Rev. 1/6/2026

Features:

- Durable piezoelectric switching*
- Mounts in single-gang box
- Stainless steel face plate

* Can be ordered with a mechanical switch or a Corvinus Electric TouchBolt™ switch instead of the piezo

Specifications:

Dimensions: 5.5” H x 3.5” W
